Instructions

1. Insure that your software is eligible for the update. Check the [Quick Details](#) section of this document for eligibility information.
2. Verify that your product version is eligible for the update!
3. IMPORTANT: **EXIT** the G1 software BEFORE installing this update.
4. Download the update by clicking on the appropriate link on the website Download page. The web site provides a ZIP format for the download as an alternate.
5. Place the .EXE Update file anywhere on the computer that runs the G1 software. If you downloaded the ZIP format, extract the EXE file from it.
6. Using Windows Explorer, double-click the .EXE Update file to run it. It will first verify that you are running an eligible version of G1 software. Follow the on-screen instructions. The update program will then install and update your system.
